

COVERING SOLUTIONS

**The right greenhouse covering protects your crops,
optimizes light transmission, and controls temperature
and humidity.**

SSJH Protected Farming Proprietary Limited

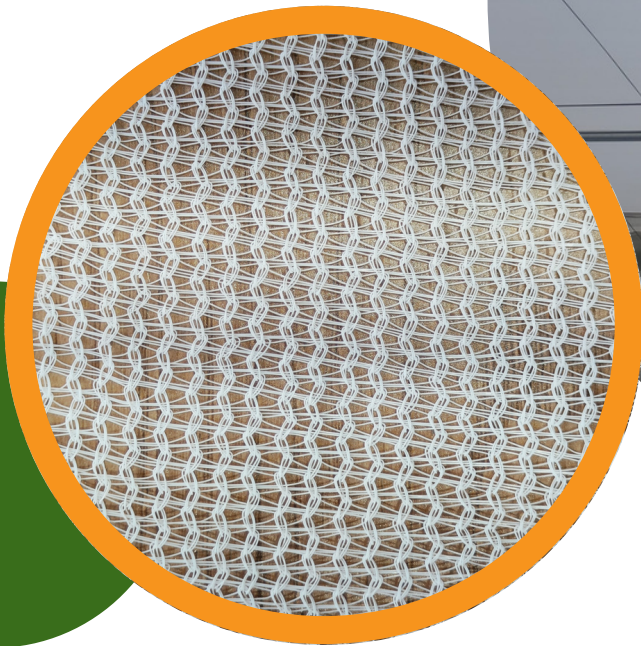

POLY FILM

Poly film plays a vital role in creating ideal growing conditions by managing light transmission and temperature control.

Key Features: UV Stabilized, Anti-Dust, Anti-Drip, Pesticide Resistant.

Technical Specifications

Width in (m)	4.50, 5.50, 7.00, 9.00, 11.00
Length in (m)	As Per Requirement
Thickness	200.00 Micron
Colour	Clear, Translucent, Milky White, Yellow, Blue
UV & Agro Chemical Protection Life	3.00 Years

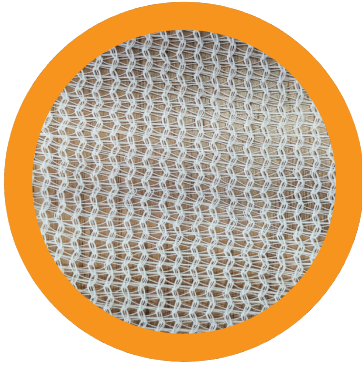

SHADE NET

It reduces light intensity, lowers temperature, and controls light quality. We offer a wide range of shade cloth options—mono x mono, tape x tape, and mono x tape in various colors and shading levels to suit your needs.

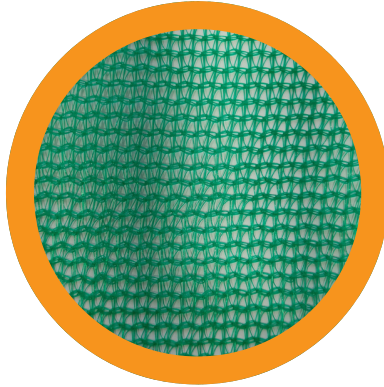

Technical Specifications

Width in (m)	As Per Requirement
Length in (m)	100.00 m & As Per Requirement
GSM	500.00 - 150.00 GSM
Shade Factor	10 - 90%
UV & Agro Chemical Protection Life	3.00 Years
Colour	White, Transparent, Green, Black, Red

SHADE NET MONO X MONO

Colour : White

GSM : 100.00 to 125.00

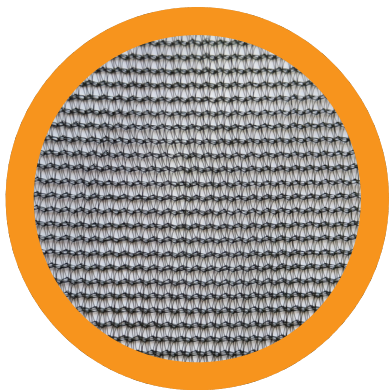

UV : 5.00 Years

Colour : Green

GSM : 100.00 to 125.00

UV : 5.00 Years

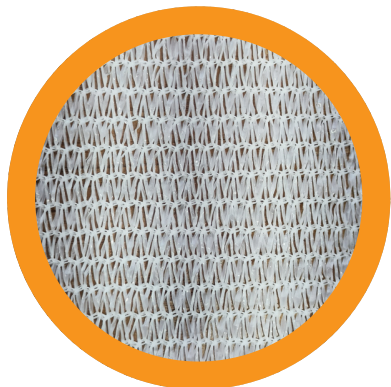

Colour : Black

GSM : 100.00 to 125.00

UV : 5.00 Years

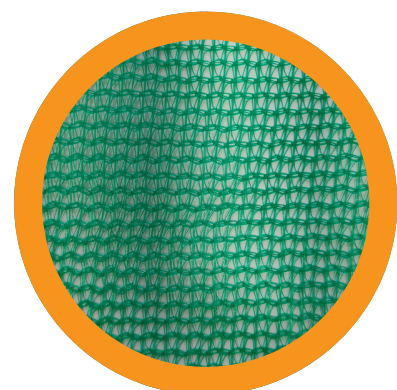

SHADE NET MONO X TAPE

Colour : White

GSM : 100.00

UV : 3.00 Years

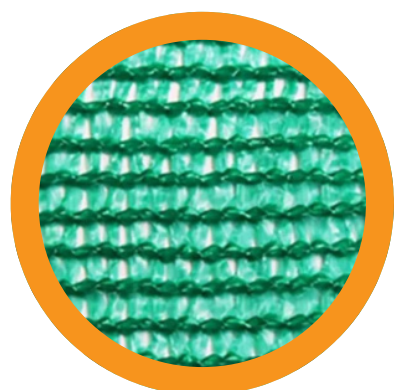

Colour : Green

GSM : 100.00

UV : 3.00 Years

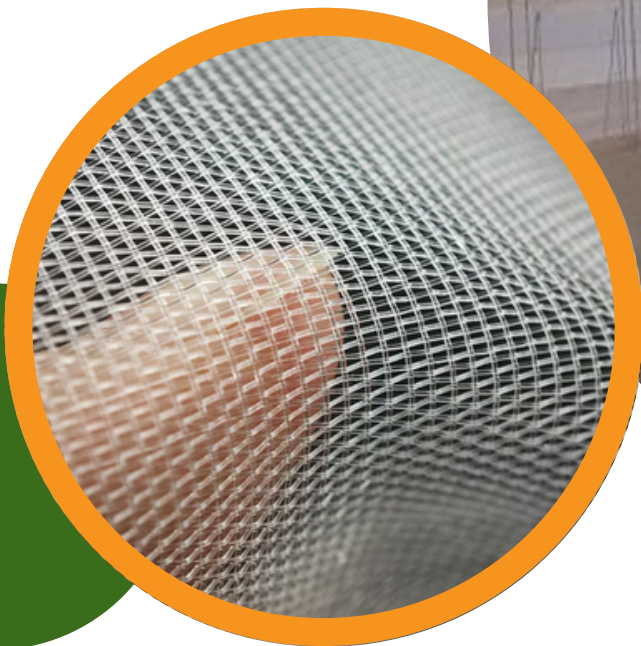

SHADE NET TAPE X TAPE

Colour : White

GSM : 100.00

UV : 5.00 Years

INSECT NET

Our Insect Net acts as a physical barrier to insects, protecting your crops naturally and reducing the need for pesticides. This not only safeguards your plants but also helps you save on pesticide costs while boosting your crop yield.

Technical Specifications

Width in (m)	2.50, 3.00, 3.60, 4.20, 5.10 m
Length in (m)	100.00 m & Customized
GSM	90.00 - 120.00 GSM
Mesh	15.00, 25.00, 30.00, 40.00, 50.00, Customized
UV & Agro Chemical Protection Life	5.00 Years
Colour	Natural, White, Green

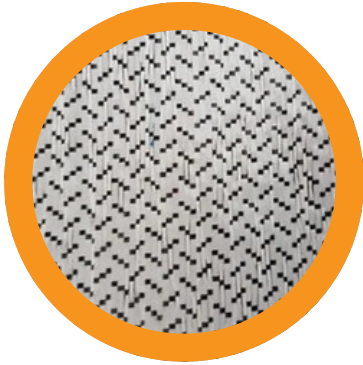

WEED MAT

Weed Mat stops the growth of unwanted weeds by attaching itself firmly to the ground. helping conserve water and reduce chemical use. Also known as ground cover, it is a permeable, weed-blocking fabric designed specifically for agricultural, landscaping, and organic applications.

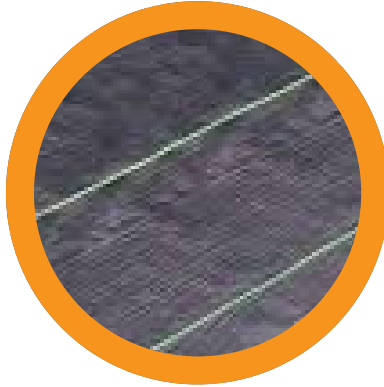

Technical Specifications

Width in (m)	1.20, 1.50, 2.00, 3.00, 4.20, 5.20 m
Length in (m)	100.00 m & Customized
GSM	90.00, 100.00, 130.00 GSM
Colour	White, Black, Black-White
UV & Agro Chemical Protection Life	5.00 Years

ANTI-HAIL NET

Designed to protect crops year-round from hail and other impacts, this durable net also shields your orchard from strong winds, promoting healthier plant growth.

Technical Specifications

Width in (m)	Up to 10.00 m & Customized
Length in (m)	Customized
GSM	50.00, 70.00, 90.00, 100.00 GSM
UV & Agro Chemical Protection Life	5.00 Years
Colour	Natural, White, Black

ANTI-BIRD NET

Anti bird netting is a lightweight, durable protective mesh installed over greenhouse structures to prevent birds from entering and damaging crops.

Technical Specifications

Width in (m)	Up to 9.00 m & Customized
Length in (m)	Customized
GSM	70.00, 100.00, 120.00 GSM
UV & Agro Chemical Protection Life	5.00 Years
Colour	Natural, White, Black

APRON

Apron Fabric is made by using High-density polyethylene woven fabric layer with Low density polyethylene film coated on both sides and is mainly used for greenhouse side wall covering.

Technical Specifications

Width in (m)	1.50, 2.00 m & Customized
---------------------	---------------------------

Length in (m)	Customized
----------------------	------------

GSM	160.00 GSM & Customized
------------	-------------------------

UV & Agro Chemical Protection Life	3.00 Years
---	------------

Colour	Natural, White

ALUMINATE NET

Aluminate Shade net delivers even shading, manages airflow, and ensures the best diffused light reach for crops. It balances day/night temperatures, fostering controlled microclimate in greenhouses, and external structures.

Technical Specifications

Width in (m)	4.40 m
Length in (m)	Customized
GSM	120.00 GSM
UV & Agro Chemical Protection Life	5.00 Years

PONDLINER

A pond liner is a water-resistant material used to retain water in large man-made water bodies such as reservoirs, retention basins, farm ponds, artificial streams in parks, etc. They're an ideal way to conserve water and reduce wastage, especially in the context of water shortage and global warming.

Technical Specifications

Width in (m)	Customized
Length in (m)	Customized
Microns	300, 500, 700, 1000
UV & Agro Chemical Protection Life	5.00 Years
Colour	Black
